

# Flexible, compact, efficient!

## The KMG series

Model	Cutting width	Swing arm disc	Number of blades	Weight	Power requirement	Dimensions (closed swing arms)	
						Width	Depth
<b>KMG 150/40</b>	87 - 150 cm	Ø 45 cm	1 + 2	340 kg	18 hp	90 cm	180 cm
<b>KMG 160/48</b>	102 - 158 cm	Ø 53 cm	1 + 2	355 kg	18 hp	105 cm	180 cm

### A workaholic!

Specially developed for the care of table-top cultures and perfected over the years.

The swing arms are controlled by a spring balancer or optionally by an automatic fine-touch control.

**Intelligent, solid construction!**  
Compact, weight-optimized and extremely manoeuvrable thanks to the high tensile steels and quality components

**Clean mulching result!**  
Rotatable swingarm disc with protective coating for clean mulching around tree-trunks or poles

**Efficient!** Clean mulching of the complete line with only one drive

**Extreme blade overlap!**  
Guarantees optimum mulching results even under the most difficult conditions

### Reliable technology - Easy maintenance!

Robust angular gear, bearings sealed by a protective labyrinth and directly accessible lubrication points.

### Get the most out of it!

Small tractors from 18 hp can already power the KMG. The movable rear wheel allows easy manoeuvring without lifting the rotary mower.
